

Honorable Chairman and Commissioners:

I am in the business of encouraging more jobs and a stronger economy. Currently, this is not possible under the Section 251 Unbundling of Incumbent Local Exchange Carriers. Please support the proposals that are before the FCC to eliminate unbundled switching and the UNE-P provisions. By doing so would free the way for great broadband investment, expedite new technologies and provide competitive telecom services to small, medium and large businesses. In turn, the business community would generate new jobs, increase capital spending and help return our national economy to vibrancy.

The elimination of costly unbundling regulations is an ineffectual form of re-regulation versus deregulation.

Sincerely,

David Spaur
